- Superior video quality incorporating the H.264 standard
- Join up to 4 video sites and 1 audio site with optional embedded MultiSite functionality

Performance features

- Performance features are determined by the TANDBERG set-top selected

The TANDBERG SL Series is designed for video communications in rough environments with details such as a durable Lexan cover and polyethylene case that protect the system from damage. The optional armored telephone handset enables privacy as well as dedicated audio when noise levels within the room are high. The SL Series provides protected connections in prisons and jails where a rugged communication solution is needed most.
